

Project Design Phase-I

Solution Architecture

Date	26 October 2022
Team ID	PNT2022TMID27711
Project Name	Web Phishing Detection
Maximum Marks	4 Marks

Solution Architecture:

Deep learning has emerged as a branch of machine learning that becomes a promising solution for phishing detection in recent years. Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- ❖ Find the best tech solution to solve existing business problems.
- ❖ Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- ❖ Define features, development phases, and solution requirements.
- ❖ specifications according to which the solution is defined, managed and delivered.
